

Power BI QuickStart

Designed to help your business realize immediate value, remove costly implementation fees, and minimize project delivery risk, the Microsoft Power BI QuickStart package can have Microsoft Power BI ready for your team to use in just two weeks. This fixed price engagement provides your organization the following:

- Up to eight (8) hours of virtual requirements gathering with stakeholders
- Create Power BI Group and assign up to five (5) users (license costs not included)
- Connections to no more than three (3) data sources
- One (1) report file with no more than five (5) pages
- No more than fifteen (15) data visualizations
- Two (2) hour virtual user training session for identified users

Assumptions

- Data sources must be in a format that Power BI can connect to natively (data extraction and/or transformation services will be scoped separately)
- If necessary, CSP Power BI Pro licensing will be acquired by client prior to project kickoff
- Power BI Admin access and all data source access will be provided to B52 Solutions prior to project kickoff
