Business Central QuickStart

Designed to help your business realize immediate value, remove costly implementation fees, and minimize project delivery risk, the Business Central QuickStart package can have Microsoft Dynamics Business Central ready for your team to use in just <u>two weeks</u>.   This fixed price package provides

- Business Central Sandbox and Production Environments Established and Configured
- Configuration of Company Information
- Creation of Business Units and Security Roles
- Connection of no more than 5 users (license costs not included)
- Outlook email integration for identified users
- Configuration of Finance (Chart of Accounts, Tax Schedules, Payment Terms, Bank Accounts)
- Configuration of Sales (Inventory Items, Customers, Sales Orders, Sales Invoices)
- Configuration of Procurement (Vendors, Purchase Orders, Purchase Invoices)
- Import of initial data (Chart of Accounts, Vendors, Customers, and Inventory Items)
- Four (4) hours of virtual training for identified users

Assumptions
- All Vendor, Customer, Inventory, and Chart of Account data will be provided to B52 in spreadsheets that meet the Microsoft import formatting standards
- One company database will be created (additional companies are an additional cost)
- Single currency (USD only)
- All custom functionality and custom reports are not included and will be quoted separately
- Business Central CSP licensing will be acquired by client prior to project kickoff
- Business Central Admin access will be provided to B52 Solutions prior to project kickoff
